Master of Science, Maritime Business Management
Massachusetts Maritime Academy

Bachelor of Science, Marine Safety and Environmental Protection
Massachusetts Maritime Academy

ABOUT

Jay is an experienced Board Certified Safety Professional (CSP) that has worked across various industries including general industry, construction, marine and nuclear.

Jay graduated from Massachusetts Maritime Academy in 2015 with a degree in Marine Safety and Environmental Protection. During his time at the academy, he worked full-time for the US Army Corps of Engineers on the Cape Cod Canal including the implementation of USACE EM-385-1-1 Health and Safety Manual requirements. He recently received a Master's Degree in Maritime Business Management from Massachusetts Maritime Academy.

He has safety management experience in civil and marine construction. Since graduating from the academy, he completed a safety engineering training program for nuclear power plants, working outages as a Safety Engineer for a multinational corporation. His professional experience also includes working as a Safety Consultant in the worker's compensation insurance industry conducting safety audits, claim investigations and facilitating in overall injury prevention.

Additionally, Jay has worked as a Marine Surveyor, Consultant and Compliance Specialist in the marine industry.

Jay assists our clients with site-specific health and safety program development, safety and health inspections, and conducting site safety auditing and safety management services for large commercial projects including DOD projects.

As a certified OSHA Outreach instructor, Jay is able to share his own experience as it relates to the training materials, which gives participants insight as to how they can apply what they are learning to their own jobs.

In addition, Jay has been the lead trainer for the last for two years for all United Alliance Services' USACE Fall Protection training under the requirements of EM385 and ANSI Z359.2.
