University of Rhode Island

ABOUT

Chris is a conscientious and reliable safety professional who brings over fifteen years of experience in Construction and General Industry Safety in a variety of federal, state, commercial and military multi-employer projects and work sites. He is a proven safety manager focused on facilitating continual improvement in knowledge, practice, and exposure reduction while regulating construction compliance programs under OSHA 29 CFR 1910, 29 CFR 1926, and US Army Corps of Engineers (USACE) EM 385.

Chris gained highly valuable knowledge through his OSHA training and certifications, as well as on the job performing preconstruction planning, subcontractor management, job hazard analyses, site logistics and working directly with trade employees. He is a resource and guide to OSHA compliance and USACE safety standards and a team builder in the development of an educated safety culture.

His safety management experience includes working with large worker populations, diverse and numerable trades and large private and public sector construction projects. He has managed safety for workforces across at least six different states. Chris has a successful history of lowering the rate of injuries and EMR through his safety management efforts.

He has provided safety management for commercial building construction, major infrastructure projects, heavy civil construction, structural steel construction, solar and power station projects.

Chris provides site safety auditing and safety management services for our clients as well as health and safety plan development and safety and compliance training. His ability to lead and foster an appreciation for safety in teams has improved safety for our clients and lowered their insurance costs and reduced injuries and time away from work.

His tireless work ethic and professional, easy-going demeanor are an asset to our safety consulting team.
